SYSTEM UPDATE SCHEDULED UPGRADE

TTG AI Ecosystem Upgrade

Back Online Before 2:00 PM ET

UPDATE REPORT: 007-05222026
MAY 22, 2026 / 9:05 AM ET

Members,

Today we are rolling out a major set of upgrades across the entire **TTG AI ecosystem**.

To complete this work properly, the main **TTG Terminal**, the primary **MARI** interface, and the **Holy Grail** will be temporarily offline while the upgrades are deployed.

Everything will be back online today, prior to 2:00 PM ET.

When the platform comes back, these will all be significantly upgraded:

- MARI
- AI Charts
- Holy Grail
- Active Trader & Live Trading
- Level 3

This is a substantial step forward for the platform: more capability, better performance, and a stronger experience across the board.

Important:

This is not an outage. The **TTG Terminal**, **AI Charts**, **Holy Grail**, and **Level 3** are intentionally offline for upgrades and deployment. Live moderator chat rooms, market data, alerts, scanners, education tools, and dashboard login remain available as normal during this window.

FAMILY MEETING

We will host a meeting today at **1:30 PM ET** in the main chat room to walk through everything that's new. Bring your questions. Adam and the team will cover all of it live.

Everything will be back online before **2:00 PM ET**. Thank you for your patience while we make the platform better for you.
